Alberta Wind Development Course

Table of Contents

1.	Course Overview.....	1
	Course Overview.....	2
	Pros of Wind	3
	Challenges of Wind.....	4
	Installed Wind Capacity	5
	Wind Generation in Canada.....	6
	Wind Development in Alberta	7
	Supply and Demand Must Balance.....	8
	Wind Farm Video	9
2.	Site Selection.....	1
	Site Development Steps.....	2
	Site Development Steps cont'd	3
	Site Development Steps cont'd	4
	Development Time Line	5
	Step 1: Find Suitable Wind.....	6
	Step 2: Show Stoppers	7
	Site Constructability Issues	8
	Step 3: Land Agreement	9
	Land Agreement.....	10
	Contract Terms (a)	11
	Contract Terms (b)	12
	Step 4: Meteorological Tower and Sensors	13
	Tilt –up Meteorological Tower	14
	Energy in Wind.....	15
	Distribution of Wind Speed.....	16
	Energy vs Wind Velocity.....	17
	Turbine Size and Power Output	18
	Energy Available at Site	19
	Turbine Performance	20
	Energy Available from 600 kW Turbine.....	21
	Capacity Factor and Revenue	22
	Capacity Factor All Hours.....	23
	Capacity Factor Winter.....	24
	Capacity Factor Summer.....	25
	Yearly Average Capacity Factor.....	26
	Typical Plant Load Factors.....	27
	Step 5: Environmental Impact Assessment	28
	Important Environmental Studies	29
	Sound Studies.....	30

Visual and Shadow Flicker Studies	31
Archaeological and Radio Studies	32
Other Environmental Studies	33
Stakeholders	34
Step 6: Wind Farm Design and Turbine Layout	35
Setbacks	36
Wind Assessment and Energy Output	37
Step 10: Economic Analysis	38
Step 11: Decision time	39
3. Equipment.....	1
History	2
VAWT Turbines.....	3
HAWT Turbines	4
Wind Generator.....	5
Nacelle Cut Away	6
Substation	7
Size of Modern Turbines	8
Size of Modern Turbines	9
Components - Foundations	10
Components - Towers	11
Components – Nacelle.....	12
Components - Rotor.....	13
Components - Blades	14
Components - Gearbox.....	15
Components - Generator	16
Components – Yaw Drive.....	17
Turbine Vendors.....	18
Turbine Vendor Market Share	19
Turbine Market	20
Turbine Vendors – Vestas (DK)	21
Turbine Vendors – GE (USA).....	22
Turbine Vendors – Enercon (GER)	23
Novel Turbine Designs	24
Cost of Modern Turbines.....	25
Turbine Comparision	26
Turbine Life and Maintenance.....	27
Turbine Life and Maintenance.....	28
Turbine Availability	29
Construction Timelines.....	30
Construction Video 1	31
Construction Video 2.....	32
4. Interconnection	1
Wind Course: Interconnection Process.....	2
Biography: Carlo Plava	3
Electricity Deregulation in Alberta	4
Result of Deregulation in Alberta	5

Interconnection Process Players.....	6
Interconnection Process Players cont'd	7
Where to Start.....	8
Distribution Connected.....	9
Distribution Connected cont'd	10
Transmission Interconnection Queue	11
Transmission Development Plan.....	12
Southern Alberta Proposed Wind Development	13
Transmission Interconnection Flowchart.....	14
Transmission Connected	15
Project Kick Off Meeting.....	16
AESO Customer Proposal and Acceptance.....	17
Execution of Agreements	18
Proposal to Provide Service (PPS)	19
Facility and Needs Application	20
Approvals and Final Requirements	21
Construction and Commissioning.....	22
Construction Wrap Up.....	23
Shared Facility Cost Contribution.....	24
Shared Facility Example.....	25
Shared Facility Cost Calculation	26
Alternative to Shared Facility.....	27
Generator System Contribution.....	28
Generator Performance Standards	29
Generator System Contribution Refund	30
Interconnection Summary	31
5. Regulatory Process	1
Wind Course: Regulatory Process	2
Approvals Execution Plan	3
The Steps.....	4
Public Consultation	5
Municipal District / County Approval.....	6
Environmental Review	7
Ongoing Environmental Review	8
Historical/Archaeological Review	9
Noise Monitoring	10
Transport Permits	11
EconEnergy.....	12
EcoLogo.....	13
Offset Certification Protocol	14
Alberta Offset Certification	15
Regulatory Process Summary	16
6. Financing	1
Presentation Outline.....	2
Resource Capital Partners – Warren G. Holmes	3
Sources of Financing	4

Equity Market	5
Equity Market cont'd	6
Debt Market.....	7
Equity Market Conclusions	8
Debt Market Conclusions	9
Presentation Context.....	10
Forms and Sources of Equity	11
Public Equity.....	12
Public Equity cont'd	13
Private Equity	14
Private Equity cont'd	15
Flow-Through Shares.....	16
Flow-Through Shares cont'd	17
Limited Partnership	18
Limited Partnership cont'd.....	19
Sources of Equity	20
Retail Investors	21
Institutional Investors – Private Equity	22
Institutional Investors – Public Equity.....	23
Forms of Debt – Company vs Project	24
Sources of Debt	25
Sources of Debt cont'd	26
Sources of Debt cont'd	27
Blanc for Now	28
Sources of Debt cont'd.....	29
Key Success Factors.....	30
Key Success Factors cont'd	31
Key Success Factors cont'd	32
Key Success Factors cont'd	33
Key Success Factors cont'd	34
Conclusions	35
7. Sale of Power and CO2	1
Sale of Power in Alberta.....	2
Financial Bilateral Contracts - CFD	3
Wind is Non-firm.....	4
Batteries	5
Production of Hydrogen.....	6
Hydro and Pump Storage.....	7
Value of GHG Credits	8
Value of CO2.....	9
Alberta – Displacement Example	10
Federal Portfolio Approach	11
Federal – Sales Approach.....	12
Cap and Trade	13
8. Cashflows	1
Cost of Green Power in BC	2

Standard Offer Programs	3
California Energy Commission Costs	4
Class 43.2	6
Tax Deductions	7
Tax Issues	8
Green Tax Incentives	9
ecoEnergy Credit.....	10
ecoEnergy Applications.....	11
Taxable Income and Net Cashflows.....	12
Federal Tax Rates.....	13
Review Wind Economic Model.....	14
First Year Cost of Power	15
Capacity Factor Impact on IRR	16
Capacity Factor Impact on Levelized Cost.....	17
Capacity Factor Impact on NPV	18
Capex Impact on IRR.....	19
Capex Impact on Levelized Cost.....	20
AESO Prices When Wind Blows	21
9. Issues for ISO	1
Transmission.....	2
Blackouts	3
Capacity	4
Load Following	5
Price Volatility.....	6
