Electric Power Industry 101

Table of Contents

1. Basic Concepts	
What is Electricity?	2
Uses of Electricity.....	3
AC Frequency	4
Three Phase	5
Transmission Voltage – AC vs DC.....	6
System Control Mechanism.....	7
Electricity Cannot Be Stored.....	8
Conservation of Energy	9
Kirchoffs First Law.....	10
Electric Power System	11
How is Electricity Measured	12
Power Units of Measurement	13
System Load Profile.....	14
2. Electricity Industry Overview	
Industry Statistics	2
From Generator to End-User	3
Canadian Electricity Demand 2008	4
Canadian Per Capita Consumption.....	5
Per Capita Electricity Use for 2009	6
Generating Capacity – to 2007.....	7
Canadian Power Generation – 2009.....	8
Canadian Thermal Generation 2008	9
Generating Capacity by Province, 2008.....	10
Typical Residential Daily Load Curve	11
Hourly Demand Profile for Alberta.....	12
Alberta Winter Week Load Profile.....	13
Alberta Summer Week Load Profile	14
Load Duration Curve	15
3. Generation	
Components of Generation	2
Generating Electricity	3
Generator Animation	4
How Electricity is Generated	5
Biomass / Coal Fired Generation	6

Coal Plant Animation	7
Coal Fired Plant.....	8
Coal Plant Video.....	9
Keephills Coal Plant.....	10
Coal Receiving and Storage	11
CANDU Reactor.....	12
Darlington Nuclear Facility - Ontario	13
Hydro Power Plant	14
Impoundment - Hoover Dam	15
Wind Generator	16
Vision Quest Wind Farm	17
Construction Video 1	18
Construction Video 2	19
Heat Rate	20
Simple Cycle Generation.....	21
Cogeneration	22
Combined Cycle Generation.....	23
Combined Cycle Power Plant.....	24
Typical Plant Economics	25

4. Transmission

What is Transmission	2
Transmission Statistics – Alberta	3
Transmission System.....	4
Transmission Support Structures.....	5
Transmission Support Structures con't.....	6
Double Circuit Transmission Line.....	7
Substation	8
Transmission Losses.....	3
Transformer.....	4
Typical Substation Transformer	5
The AESO's Role in Transmission	6
Transmission Importance of Inerties	7
Scheduling Imports and Exports	8
Transmission Planning	9
System Planning Criteria	10
Transmission Planning cont'd	11
Transmission Planning cont'd	12
Transmission Costs.....	13
Transmission Tariff	14
Tariff Implications of Regulations	15
Demand Transmission Service Tariff	16
Supply Transmission Service Tariff.....	17
Transmission Facility Owners.....	18
7 TFOs in Alberta	19

Transmission Costs.....	20
Alberta’s Transmission Cost Recovery.....	21
Goal of New Regulations.....	22
Goals of New Regulations Con’t	23
Goals of New Regulations Con’t	24
Interconnection Alberta and BC	25
Proposed Transmission Additions.....	27
5. Distribution	
What is Distribution.....	2
Distribution.....	3
Distribution Transformer Pole	4
6. System Operations	
System Control Parameters.....	2
System Control Mechanism.....	3
Reserve Margin.....	4
System Operating Constraints.....	5
System Operating Constraints con’t.....	6
Generation Operating Constraints	7
System Operations	8
Ancillary Services	9
Types of Ancillary Services	10
Operating Reserves.....	11
Three Types of Operating Reserves.....	12
7. Pricing and Rates	
Electricity Rates	2
Four Ways to Buy Power	3
1) Regulated Rates	4
Revenue Requirement.....	5
Cost of Service Process	6
Determination of Rates.....	7
Rate Structures.....	8
Typical Residential Bill Components.....	9
BC Hydro Residential Bill	10
BC Hydro Smart Grid.....	11
Regulated Retail Rates – Alberta	12
Wires Owners – Alberta.....	13
Wires Service Providers	14
Flow-through RRT – Alberta.....	15
Alberta’s Regulated Retail Rate	16
Typical Residential Bill – Alberta.....	17
Riders	18

Retail Rate – Ontario	19
Two Types of Meters	20
How to Read an Electromechanical Meter	21
Calculating Energy Use and Cost	22
Ontario Time-of-use Meter Rates	23
Av. Residential Electricity Prices 2008.....	24
2) Competitive Offer.....	25
Alberta’s Retail Market.....	26
Alberta Retailers	27
Responsibility of Retailers	28
Self-Retailers	29
Retail Restructuring: ENMAX Example	30
3) Purchases from the Pool.....	31
How Spot Price is Determined (1)	32
How Spot Price is Determined (2)	33
How Spot Price is Determined (3)	34
Prices Change as Load Changes.....	35
AESO Supply and Demand.....	36
AESO Supply and Demand.....	37
Market Heat Rate	38
AESO C vs. Pool Prices	39
Why Do Prices Spike?.....	40
Why Do Prices Spike?.....	41
Electricity Price Determinants.....	42
Electricity Price Determinants.....	43
Electricity Price Determinants.....	44
4) Purchase from a Marketer	45
Physical Bilateral Contract.....	46
Financial Bilateral Contacts – CFD	47
How a Monthly Bill is Determined.....	48

8. Alberta Market Structure

Industry Structure	2
What Does the AESO Do?	3
AESO Board.....	4
Major Functions of the AESO	5
Wholesale Energy Market	6
Real-Time Electric System Operator.....	7
System Control Parameters	8
System Reserves	9
Settlement	10
Load Settlement	11
The AESO’s Role in Transmission	12
The Alberta Utilities Commission (AUC).....	13
Why is there Regulation?	14

What is Regulated in the Industry?	15
How Does the AUC Regulate?	16
Types of Hearings	17
Market Surveillance Administrator	18
MSA Monitoring Responsibilities	19
Undesirable Practices	20
Alberta's Market Design	21
Power Purchase Arrangements	22
Unsold PPAs	23
Balancing Pool	24
Utilities Consumer Advocate	25

9. Electricity and the Environment

GHG Emissions in Canada	2
GHG from Plants in Alberta – 2007	3
Canadian GHG Emissions – 2007	4
GHG from Canadian Power Plants	5
Characteristics of Generation Technologies	6
Comparisons of Environmental Impacts	7
CO2 Emissions by Generation Type	8
Typical Plant Emissions.....	9
SO ₂ Emissions by Alberta Coal Plants.....	10
SO ₂ Emissions in Canada 2007.....	11
NOx Emissions by Alberta Plants	12
NOx Emissions in Canadian in 2007.....	13
Mercury Emissions Alberta Coal Plants.....	14
Mercury Emissions in Canada in 2007.....	15
Environment Initiatives.....	16
BC Initiatives	17
Alberta Initiatives.....	18
Ontario Initiatives	19
Federal GHG Plan.....	20
Expected Change to Emissions.....	21
Types of Government Regulations.....	22
Emission Trading	23
Air Pollutants Emissions.....	24
Value of CO2	25
Environmental Costs for Power, 2009	26
